## EDUCATION

Misrimal Navajee Munoth Jain Engineering College  
Bachelor of Engineering in *Computer Science and Engineering*

Aug 2021 - Oct 2025  
CGPA: 7.34/10

## PROFESSIONAL EXPERIENCE

### Generative AI & Prompt Engineer | Edufic Digital

July 2024 – August 2024

Software Engineer Intern

Chennai, TN

- Analyzed system interaction logs and user feedback to troubleshoot and refine LLM execution prompts, improving user satisfaction for 50,000+ active users.
- Collaborated directly with cross-functional technical teams to diagnose performance bottlenecks in internal tools, accelerating resolution times by 40%.

### Venkateswara Agency

May 2024 – July 2024

Software Engineer Intern

Madurai, TN

- Engineered and maintained a Python-based desktop billing system, resolving transactional errors and achieving 100% data integrity across 10,000+ records.
- Provided direct technical support and training to non-technical users, reducing administrative support calls and operational issues by 50%.

## PROJECTS

### Java Learning Platform | Flutter, Dart, Vibe Coding, AI Orchestration

Feb 2026

- Designed an interactive mobile learning interface, optimizing state management and user workflows to minimize app crashes and latency.
- Built a comprehensive mobile learning app via **Vibe Coding** methodologies, utilizing AI agents to generate 80% of the Flutter/Dart boilerplate and UI components.
- Integrated interactive code snippets and progress tracking, reducing time-to-market by 3x through rapid prompt-based iterations.
- Conducted end-to-end testing across multiple Android environments to identify and fix UI/UX bugs prior to deployment.

### Modern Bingo Mobile | React Native, JavaScript, Prompt Engineering

Feb 2026

- Developed a premium, multi-platform Bingo game employing **Prompt Engineering** to optimize game logic and high-fidelity UI/UX component structures via LLMs.

### E-HealthCare Management System | Java, MySQL, JSP, Servlets

Jun 2022 – Jul 2022

- Built a healthcare management portal handling 10,000+ patient records using Java, Servlets, and MySQL, implementing automated billing workflows to eliminate system errors.
- Diagnosed and resolved database query bottlenecks to maintain fast page load times and data accuracy.

### Online Courier Tracking System | Java, MySQL, JSP, HTML/CSS

Jun 2022 – Jul 2022

- Developed a real-time package monitoring system handling 5,000+ courier details, increasing user satisfaction by 70% via transparent delivery status updates.
- Optimized logistics workflows by implementing an automated inquiry system, reducing customer support calls by 60%.

### Decentralized Money Transfer | Solidity, Ethereum, Blockchain

May 2023

- Architected secure **Smart Contracts** in Solidity, achieving 100% transaction transparency and a 95% reduction in manual processing errors.

## TECHNICAL SKILLS

**Core Technical & Troubleshooting:** API Testing (Postman), HTTP Protocols, Webhooks, Web Architectures, Error Log Analysis.

**AI & Orchestration:** Vibe Coding, Prompt Engineering (Few-shot, CoT), LLM Integration, Cursor, Claude/GPT-4o

**Languages:** Python, Dart, Java, JavaScript, SQL (MySQL, SQLite), HTML/CSS.

**Frameworks:** Flutter, React Native, Node.js, J2EE, JDBC, Bootstrap

**Support Capabilities:** Technical Troubleshooting, Root Cause Analysis, Documentation, Customer Communication, SLA Management.

**Developer Tools:** Git, Browser DevTools, Postman, SQLite Browser, Linux/Terminal, Docker, GCP, Neovim, VS Code
